

# Investor 1-Pager: NeuroLocked Token (NEURO)

## Tagline:

**The first antivirus platform for the human mind and body.**

## Overview:

Artificial intelligence and electromagnetic technologies are evolving faster than traditional defenses. NeuroLocked introduces a decentralized response — a blockchain-powered platform designed to detect, educate, and defend against AI-based bio-signal interference. Our native token, **NEURO**, fuels access, incentives, and governance across a full-spectrum human defense ecosystem.

## NEURO Token Utility

### Access / Usage

1. Unlock exclusive neuro-defense courses and materials
2. Enter token-gated expert Q&A sessions and forums
3. Redeem for wearable EMF/ultrasound shielding tech
4. Discounted pricing on protection gear and devices
5. Access exclusive webinars and neurotech briefings
6. Request custom neuro-threat research reports
7. Priority access to product pre-sales and drops
8. Staking for advanced platform features and tiered access
9. API access to AI threat detection tools
10. Premium technical and support services

### Governance

11. Vote on R&D priorities and platform development
12. Submit proposals for new features or tools
13. Elect scientific advisors and review boards
14. Govern token economics and staking policies
15. Vote on partnerships, integrations, and feature roadmaps

### Incentives / Reputation

16. Reward verified contributions to research or learning materials
17. Incentivize peer-reviewers of scientific and defense content
18. Earn status badges and roles within the DAO ecosystem
19. Bounty rewards for developers, researchers, and educators
20. Token bonuses for course completion milestones

## **Ecosystem Growth**

21. Use NEURO for platform-branded merchandise and tools
22. Micro-payments for AI-generated threat alerts
23. Event ticketing (IRL meetups, summits, hackathons)
24. Payments across verified affiliate marketplaces
25. Access token-curated neurotech research archives

## **Blockchain:**

**Solana** – chosen for low fees, high speed, and smart contract flexibility.

## **Use of Funds:**

- Finalize hardware development for signal protection
- Launch digital learning platform
- Expand threat detection & alert system
- Grow strategic alliances with researchers and developers
- Build out DAO governance via Realms and community tooling
